PROFESSIONAL SUMMARY

Data Analytics and Business Intelligence intern candidate pursuing B.E. Computer Engineering (Expected 2027) with hands-on experience in SQL data warehousing, Excel/Power BI/Tableau dashboard development, and statistical analysis. Skilled in exploratory data analysis (EDA), data cleaning and validation, KPI tracking, and data storytelling to support business teams with data-driven insights. Proven ability to build end-to-end analytics solutions — from data cleaning and SQL querying to stakeholder-ready dashboards and reports — that deliver actionable insights for cross-functional stakeholders.

TECHNICAL SKILLS

BI & Visualization: Power BI (DAX, Automated Reports), Tableau (LOD Expressions, Dynamic Filters), Excel (Pivot Tables, Power Query, VLOOKUP)

Languages & Databases: SQL (CTEs, Window Functions, Query Optimization), Python, SQL Server, MySQL, PostgreSQL

Core Competencies: Exploratory Data Analysis (EDA), Data Cleaning & Validation, Dashboard Development, KPI Analysis, Statistical Analysis, Business Intelligence, Data Storytelling & Insight Presentation, Attention to Detail

Analytics & Libraries: Pandas, NumPy, Scikit-learn, Matplotlib, Seaborn, Streamlit, Jupyter Notebook, TensorFlow

Data Engineering: ETL Pipelines, Data Warehousing, Star Schema, Medallion Architecture, Data Documentation, Data Lineage, Git/GitHub

EXPERIENCE

Finance Intern | Agratas Edutech | Pune, India

Dec 2024 – Feb 2025

- Accelerated decision speed for 3 senior stakeholders by building 2 interactive Excel BI dashboards tracking payment velocity and inventory turnover KPIs — as measured by full elimination of manual weekly reporting cycles — by conducting exploratory data analysis (EDA) on 12 months of transactional data and developing dashboard visualizations enabling real-time, self-service data access.
- Consolidated 12 months of corporate performance data by engineering automated Excel financial models unifying liquidity ratios, receivables turnover, and cash conversion cycles; presented findings weekly to the finance lead, enabling hypothesis-driven cash flow decisions.
- Supported strategic planning across 3 growth horizons by applying statistical analysis and KPI analysis to CAC and DTC revenue trends for a consumer startup; delivered stakeholder reporting with forecasts that directly informed leadership budget allocation.

PROJECTS

SQL Data Warehouse & ETL Analytics Platform

SQL Server · ETL · Star Schema · Medallion Architecture

- Architected a 3-layer Medallion (Bronze / Silver / Gold) data warehouse on SQL Server ingesting and cleaning 116,000+ records from 6 CRM/ERP source tables, enforcing data quality checks and integrity constraints across all ETL pipeline layers.
- Engineered a reporting-ready Star Schema (1 fact table, 5 dimension tables) using advanced SQL — CTEs, window functions, multi-table joins — enabling Power BI and Tableau consumption with zero manual pre-processing.
- Published full data documentation including architecture diagrams, data lineage maps, and a data catalog; established data validation standards enabling self-service business intelligence for cross-functional stakeholders.

HR Workforce Analytics Dashboard

Tableau · Python · Pandas · Root Cause Analysis

- Cleaned, validated, and standardized 8,950 employee records across 15 variables in Python — eliminating null values and enforcing data validation checks — to ensure dashboard-ready data quality for Tableau reporting.
- Developed a 3-page interactive Tableau dashboard with 5 dynamic context filters for KPI analysis of 969 historical attrition patterns, enabling self-service workforce analytics and stakeholder reporting for HR leadership.
- Performed root cause analysis across 7 corporate divisions, identifying Operations as the critical attrition hotspot at 10.8% variance above baseline, directly informing headcount stabilization strategy.

Bitcoin Market Sentiment & Trader Performance Analytics Platform

Python · SQL Server · Scikit-learn · Streamlit

- Built a SQL Server analytics pipeline ingesting 211,224 Hyperliquid trade records and 2,644 Bitcoin Fear & Greed Index observations (2023-2025); performed data cleaning, data validation, timestamp conversion, and data integration into a consolidated analysis schema.
- Conducted exploratory data analysis (EDA) across 25 trader accounts on 6 KPIs (PnL, win rate, drawdown, trade frequency, position size, long/short bias) by sentiment regime; uncovering Fear periods as highest profitability and trading activity drivers.

EDUCATION

B.E. Computer Engineering | Pimpri Chinchwad College of Engineering, Pune | CGPA: 7.4 / 10.0

2023 – 2027

CERTIFICATIONS

- IBM AI Engineering Professional Certificate (2024)** — Foundational ML, neural networks, and deep learning using Python and Keras
- NPTEL Elite: AI for Investments — IIT Kanpur (2024)** — Quantitative finance, algorithmic trading, and ML applications in financial markets
- AWS Academy: Cloud Foundations & Machine Learning Foundations (2024)** — Cloud infrastructure and ML deployment on AWS
