

Assignment Title

Design a Personal Portfolio Page using HTML and CSS (Using Bootstrap CDN)

Name: Yash Mahajan

PRN: 123B1B289

DIV: D

Objectives

- To design a personal portfolio webpage using HTML and CSS.
- To understand layout design using sidebar and content sections.
- To learn usage of Bootstrap CDN for responsive design.
- To present personal, academic, and technical details in webpage format.

Outcomes

- Learned to design modern portfolio web pages.
- Understood responsive design using Bootstrap.
- Learned to combine custom CSS with Bootstrap.
- Able to create structured sections like About, Skills, Projects, and Contact.

Theory Concept in Brief

A Personal Portfolio Website is a web page that represents an individual's academic, technical, and professional profile. It is widely used by students and professionals to showcase their skills, projects, and achievements.

HTML is used to create the structure of the webpage. It defines elements like headings, sections, navigation links, and content layout.

CSS is used to style the webpage. It controls colors, spacing, fonts, layout, and responsiveness.

Bootstrap is a CSS framework that helps in building responsive and mobile-friendly web pages quickly. It provides ready-made classes for layout, typography, cards, spacing, and navigation.

Bootstrap CDN (Content Delivery Network) allows developers to use Bootstrap without downloading it. It is directly linked inside the HTML file.

In this portfolio:

- Sidebar is used for navigation and personal info
- Sections are used for About, Skills, Projects, and Contact
- Cards are used to display content neatly
- Media queries are used for responsive design

Dataset Used

Not Applicable.

This assignment is based on static web design and does not require any dataset.

Conclusion

In this assignment, we successfully designed a personal portfolio webpage using HTML, CSS, and Bootstrap CDN. We learned how to create structured layouts, responsive designs, and professional-looking web pages. This assignment helped in improving frontend development skills and understanding modern web design practices.
